

HYLOAD CLOAKED FLASHING SYSTEM

Mastic

DESCRIPTION

Hyload Mastic is neoprene-based mastic. It has excellent adhesion to structural concrete, masonry, gypsum, metal, wood.

USE

Hyload Mastic is designed to protect the termination edges of patches and overlaps in all details.

Hyload Mastic is an integral part of the *Hyload Flashing Cloaked System*. Substitution is not allowed.

APPLICATION

Apply *Hyload Mastic* with a caulking gun or trowel or by hand using rubber gloves. If applied with a caulking gun, strike the bead off with a trowel to about a 1/8" (3mm) thickness and a 1/2" to 1" (13-25mm) width. When applied as a temporary cut off, trowel *Hyload Mastic* to the thickness of the membrane.

The amount of *Hyload Mastic* will vary widely from job to job. A 1/4" bead will produce approximately 90 feet. Available in 32 oz. Tubes

SAFETY, STORAGE AND HANDLING INFORMATION

Precaution: Keep container tightly closed when not in use. Store at room temperature.
